

SAVING SIGHT

Vision Protection &
Blindness Prevention
in Diabetes

bellinhealth

dkbmed

This program is jointly provided by Bellin Health Systems and DKBmed LLC.
This activity is supported by an independent medical education grant from Regeneron Pharmaceuticals, Inc.

Diabetes can cause blindness.

40% of people with diabetes have diabetic retinopathy — the number one cause of blindness among working-age adults.

Many people with diabetes do not realize they are losing their vision because the damage occurs slowly. Screening for diabetic retinopathy can catch the problem while it is still treatable.

At Bellin Health, we want all eligible patients screened for diabetic retinopathy.

Do not wait. Get screened today.

Screening does not take the place of a complete eye exam... but it may save your sight.

Ask your healthcare provider about getting screened today!
